

WHAT IS CLAIMED IS

1. A background setting for an aquarium having front and rear walls and opposite left and right side walls,  
5 comprising a water-resistant background sheet bearing a background scenery for direct submersion in the water of said aquarium to cover said rear wall, and a fixture for fixing the background sheet inside said aquarium.
- 10 2. The background setting as claimed in claim 1, wherein the fixture comprises a groove provided at the bottom of said tank, the groove opening upwards for holding a bottom edge of the background sheet.
- 15 3. The background setting as claimed in claim 1, wherein the background sheet is arranged to cover also said left and right side walls.
4. The background setting as claimed in claim 3, wherein  
20 the background sheet is arranged to extend from a front left corner of said tank and close to said left wall, then turns smoothly to said rear wall and extends therealong, then turns smoothly to said right wall and extends close thereto, and finally terminates at a front right corner of  
25 said tank.

5. The background setting as claimed in claim 4, wherein the fixture comprises a groove provided at the bottom of said tank, which extends and turns in substantially the same profile as the background sheet and opens upwards for holding a bottom edge of the background sheet.

6. The background setting as claimed in claim 1, wherein the fixture comprises a plurality of suction members for holding a top edge of the background sheet to said tank.

7. The background setting as claimed in claim 6, wherein the top edge of the background sheet has a plurality of holes for engagement by the suction members respectively.

15

8. The background setting as claimed in claim 1, wherein the fixture comprises a removable mount fixedly supporting the background sheet thereon before they are positioned inside said tank.

20

9. The background setting as claimed in claim 8, wherein the mount comprises a planar middle section for extending over said rear wall and opposite left and right side sections curved smoothly therefrom for extending over said left and right side walls.

25

10. The background setting as claimed in claim 1, wherein  
the fixture comprises a pair of scroll rollers for use  
within opposite left and right sides of said tanks, on  
5 which rollers opposite ends of the background sheet are  
wound.
